

Twine Collection Fundraiser

Simply Agriculture Solutions would like to increase the participation and awareness of plastic twine recycling by offering an opportunity for youth groups to participate in the Agricultural Plastics Recycling pilot collection program as a fundraiser for their respective group.

Groups will be reimbursed a minimum of \$0.10/lb for twine collected. Twine should be dry and free of debris (hay/straw/manure). Less than 10% debris is required. Twine should be in loose strands if possible to facilitate the cleaning process once received by recycler. Melted twine (as removed from knife of bale shredder) is acceptable but it cannot be burned. Net wrap can be collected but it is not eligible for funding at this time and must be kept separate from twine.

Each collection group will be responsible for storing collected twine till it is transported to one of the collection sites across the province. Map of collection site can be found on our website (www.simplyag.ca).

This is a great opportunity for groups to actively engage their fellow producers and help the environment at the same time!

Contact Travis Quirk 306-955-5477 ext 204 or travis@simplyag.ca for more details on participating in this fundraiser program.
